Key Risk Disclosure

The following risk disclosure statements cannot disclose all the risks involved. You should undertake your own research and study before you trade or invest. You should carefully consider whether trading or investment is suitable in light of your own financial position, investment experience and investment objective. You are advised to seek independent financial and professional advice before you trade or invest. You should seek independent professional advice if you are uncertain of or have not understood any aspect of the following risk disclosure statements or the nature and risks involved in trading or investment.

1. Related Risk Disclosure of Securities Trading

The prices of securities fluctuate, sometimes dramatically. The price of a security may move up or down, and may become valueless. It is as likely that losses will be incurred rather than profit made as a result of buying and selling securities.

2. Risk of Securities Margin Service

The risk of loss in financing a transaction by deposit of collateral is significant. Due to the prices of securities fluctuate, sometimes dramatically, you may sustain losses in excess of your cash and any other assets deposited as collateral with us. Market conditions may make it impossible to execute contingent orders, such as "stop-loss" or "stop-limit" orders so as to limit your losses. You may be called upon at short notice to make additional margin or interest payments. If the required margin or interest payments are not made within the prescribed time, your collateral may be liquidated without your consent. Moreover, you will remain liable for any resulting deficit in your account and interest charged on your account. You should therefore carefully consider whether such a financing arrangement is suitable in light of your own financial position, investment experience and investment objective.

Quotas used up

immediately suspended and no further buy orders will be accepted for the remainder of the day. Buy orders which have been accepted will not be affected by the using up of the daily quota, while sell orders will be continued to be accepted.

Trading day difference

As mentioned above, Shanghai-Hong Kong Stock Connect or Shenzhen-Hong Kong Stock Connect will only operate on days when both markets are open for trading and when banks in both markets are open on the corresponding settlement days. So it is possible that there are occasions when it is a normal trading day for the mainland market but Hong Kong investors cannot carry out any A-share trading. Investors should take note of the days Shanghai-Hong Kong Stock Connect or Shenzhen-Hong Kong Stock Connect is open for business and decide according to their own risk tolerance capability whether or not to take on the risk of price fluctuations in A-shares during the time when Shanghai-Hong Kong Stock Connect or Shenzhen-Hong Kong Stock Connect is not trading.

Restrictions on selling imposed by front-end monitoring

For investors who usually keep their A-shares outside of their brokers, if they want to sell certain A-shares they hold, they must transfer those A-shares to the respective accounts of their brokers before the market opens on the day of selling (T day). If they fail to meet this deadline, they will not be able to sell those A-shares on T day.

The recalling of eligible stocks

When a stock is recalled from the scope of eligible stocks for trading via Shanghai-Hong Kong Stock Connect or Shenzhen-Hong Kong Stock Connect for above-mentioned reasons, the stock can only be sold but restricted from being bought. Investors should therefore pay close attention to the list of eligible stocks as provided and renewed from time to time by both Exchanges.
